## Facts About The Eyes

Headache is very frequently caused from defective eyes. The vision may be good, often very good, but at an enormous expense of nerve energy, as in the case of far-sightedness, the muscles of the eyes are continuously at work during all hours while awake, and no wonder they become exhausted. Properly fitted glasses will invariably relieve this condition.

I shall be glad to see you and talk the matter over with you.

L. GRUNWALD, Optometrist
